Emergency Notification System

School Edition v2.0

Don't let your school get a failing grade in communications.

**The Emergency Notification System
School Edition v2.0**

Advanced Voice Solutions provides your school with the ability to always communicate with the parents and teachers of your school district when it is needed most. In a time when communications are vital it is imperative that you reach all of the people who need to be contacted as quickly and as easily as possible. With this system you will be able to notify parents and teachers of all school info in a single action. In an emergency situation there is not enough time to make multiple phone calls to notify all of the parents in a school district. Make calling trees a thing of the past with a reliable system that will reach everyone in the district quickly.

Advanced Voice Solutions

Changing the way you communicate!

Emergency Notification System School Edition v2.0

Advanced Voice Solutions is an IVR based platform that can notify an entire school district by sending one voice/text/email message. Stay connected to your district and keep parents and teachers informed with up to the minute school information. Also now including a homework hotline to help parents keep track of the homework assignments their child has been assigned.

Overview of the system:

In the world of constant communication it is imperative to keep in touch with the parents and/or teachers of your school. The Emergency Notification System - School Edition will make conveying information to the people who need it the most as simple as clicking a button or picking up the phone. Not all notifications are emergencies. When you also have school information to convey to the parents or teachers of the school the system will alleviate the work load.

This system is used to notify parents and teachers via the phone, email and text message of school information. Not all information is an emergency.

With this system you can notify:

- All Parents
- All Teachers
- All Bus Routes
- Individual Bus Routes
- Individual Classes
- Individual Sports Teams
- Individual School Clubs

The system can also be used to send out a mass mailing or mass emailing to all of the parents and teachers. Another key feature is the addition of the homework hotline. The homework hotline allows teachers to record their daily homework assignment allowing the parents of the students to review their child's homework.

When to use the system:

- In the event of an emergency to notify all parents/teachers
- When school is closed (due to weather or other reason)
- When a bus is running late
- To send information or a reminder to a class
- To send a field trip reminder to the parents
- To send information or a reminder to a sports team
- To send a practice or game reminder to a sports team
- To send information or a reminder to a school club
- To notify parents about open school night
- To notify parents about report cards
- To allow parents to review their child's homework assignments
- Plus many more types of notifications...

Technologies used by the Emergency Notification System:

Key Features:

Emergency Notification: When an emergency occurs and information needs to be delivered to the parents or teachers quickly, the system allows you to send one message and ALL parents or teachers will receive the same message quickly.

Non-Emergency Notification: When you need to convey information to the parents or teachers in the school district the system can be used to send this information. The system can delay the time a message is to be sent out to the parents until after business hours; when you will be more likely to reach the parents on their home phone.

Out-Dial (Call Outs): The system can make from 12 to 64 calls at the same time to notify parents and teachers of school information or emergencies.

SMS: Send SMS (Text Messages) to all parents or teachers to notify them of school information.

Email: Send email messages to all parents or teachers to notify them of school information.

Mass Mailing: Export a text delimited file to use for a mail merge program to send out letters to all parents or teachers.

Bus Routes: Call the parents of all students on an individual bus or all bus routes.

Classes: Call the parents of all students in an individual class to notify them of class information.

Sports Teams: Call all of the parents of the students on an individual sports team to notify them of team information.

Clubs: Call all of the parents of the students in an individual club to notify them of club information.

Teachers Messages: The teachers have the ability to send messages to the classes they teach, the sports teams they coach as well as the clubs they are in charge of. Also the teachers can use the homework hotline function for their classes to allow parents stay informed of current assignments.

Homework Hotline: The teachers can record the homework assignment for the day, allowing the parents of the students to call into the system to review the homework assignment for their child. Homework assignments can be updated daily, weekly or as often as the teacher would like.

Upgrades: Every system includes one year of free upgrades, with the option to purchase service plans that include software upgrades. The engineering team is constantly adding on new modules requested by clients.

Training: Advanced Voice Solutions offers full system administration training for the Emergency Notification System - School Edition v2.0 included with every system, also a refresher course with every service plan. Training for the system is done over the phone with a remote connection to the system. This allows training for your employees no matter where in the world they are located.

Support: Advanced Voice Solutions provides remote support for the first year with every system. After the first year there is an option to purchase a service plan from AVS to cover your system. With remote support powered by Citrix, Advanced Voice Solutions can help with any question or issue you might have almost immediately. It is like having an Advanced Voice Solutions Certified Engineer at your location anytime you need one.
